EDUCATION

IMS Enginnering College

Bachelor of Technology - Information Technology

Ghaziabad, India

2019 - Present

Courses : OOPs, Operating System, Databases, Data Structures, Analysis of Algorithm, Computer Networks, Java

PROJECTS

Face Recognition WebApp | [Project URL](#)

- Created a full stack web application with React.js which have a Register/SignIn form and user profile storing the user data in the backend PostgreSQL database and using encryption library to store sensitive user information.
- Implemented Clarifai API on the backend using node.js and express.js which identify human faces on a given image by entering its URL.
- Analyzed the HTTP requests through Postman and deployed the backend on the Heroku cloud platform.

Robofriends WebApp | [Project URL](#)

- Developed a frontend web application with React.js with the functionality of searching users from given user profiles which are generated using API.
- Deployed the project on Netlify from Github and learned to improve site speed by managing various libraries.

EXPERIENCES

PROJECT EXPERIENCE

Jaipur, India

[BookMySangat.com](#)

2021- Present

- Collaborated with a team of developers to build the prototype of an instruments lending website for a musician client which has 100+ customers.
- Implementing other websites for the same client regarding booking musical events and booking Tabla Classes.

VOLUNTEER EXPERIENCE

Jaipur, India

[Japuir Literature Festival](#)

March 2021- April 2021

- Managed the world's largest free literary festival by working in a team to organize various events and venues for 300+ authors and 4,00,000+ people.
- Strategized the process of executing tasks in small pieces to maintain proper order and learned about various approaches to encountering people.
- Communicated with various authors, guest delegates and ministers of various countries to resolve their problems during festival.

Ghaziabad, India
